ABOUT

Full-stack engineer with 2.3+ years of experience building scalable web applications, RESTful APIs, and performance-optimised solutions. Proficient in modern stacks including React, Next.js, Node.js, Express.js, and Prisma ORM. Built and continue to scale TheQuickAssist, a multi-tenant SaaS platform combining a RAG-based AI chatbot builder with a WhatsApp Business CRM, now serving 100+ businesses. Hands-on experience with OpenAI integrations, Pinecone vector databases, Meta Business API, BullMQ/Redis async processing, and backend system design focused on performance, scalability, and clean architecture.

SKILLS

Languages: TypeScript, JavaScript

Frontend: React.js, Next.js, Angular.js

Backend: Node.js, Express.js

Database: PostgreSQL, MongoDB, Prisma ORM, Redis

AI / GenAI: OpenAI API, RAG Architecture, Pinecone Vector DB, Embeddings, Semantic Search, Firecrawl

Integrations: Meta Business API (WhatsApp), BullMQ Job Queues, WebSockets

Tools: Git/GitHub, Postman, CI/CD, Agile

Concepts: REST APIs, JWT Authentication, Multi-Tenant Architecture, Microservices, Queue Processing

EXPERIENCE

Full Stack Developer · *Prominno Labs Pvt. Ltd.*

Oct 2025 – May 2026

- Built and shipped TheQuickAssist, a multi-tenant SaaS combining a RAG-based AI chatbot builder with a WhatsApp Business CRM, now used by 100+ businesses.
- Engineered WhatsApp broadcast campaigns and automated messaging workflows using BullMQ and Redis for reliable async job processing at scale.
- Integrated Meta Business API for WhatsApp messaging, contact management, and campaign delivery tracking.
- Built automated RAG ingestion pipeline (crawl → chunk → embed → index) using Firecrawl and OpenAI embeddings, with semantic search via Pinecone.
- Designed secure, isolated multi-tenant APIs for chatbot owners, workspaces, permissions, and knowledge bases.

Software Engineer · *Consociate Solutions Pvt. Ltd.*

Jan 2024 – Sep 2025

- Developed and deployed 5+ production full-stack applications for real clients using Next.js, TypeScript, Prisma ORM, Node.js, Express.js, and PostgreSQL.
- Built and maintained RESTful APIs; optimised database queries reducing average API response time by ~20%.
- Delivered full-stack features with MERN stack and Next.js SSR, improving page performance via code splitting and lazy loading.
- Led code reviews and mentored junior developers, increasing team delivery speed and code quality.

- Managed CI/CD deployments to production for multiple client-facing applications.

PROJECTS

1. TheQuickAssist — AI Chatbot Builder & WhatsApp CRM

Tech: *React.js, Next.js, Node.js, Express.js, MongoDB, OpenAI, Pinecone, Firecrawl, Meta Business API, BullMQ, Redis*

- Live multi-tenant SaaS combining a RAG-based AI chatbot builder with a WhatsApp Business CRM, serving 100+ businesses.
- Built a full document ingestion pipeline (crawl → chunk → embed → index) with Firecrawl and OpenAI embeddings; semantic search via Pinecone improved retrieval precision.
- Integrated Meta Business API for WhatsApp messaging; used BullMQ and Redis to power reliable broadcast campaigns and async job queues at scale.
- Designed secure APIs for chatbot configuration, knowledge management, contact/campaign management, and isolated tenant workspaces.

2. Real Estate CRM Platform

Tech: *React.js, Node.js, Express.js, Next.js, PostgreSQL, WebSockets, Prisma ORM*

- Architected a CRM solution for real estate agencies with multi-role access (agent, admin, coordinator).
- Integrated real-time communication via WebSockets, improving agent response time by 30%.
- Built modules for referral tracking, lead status updates, and user activity logs to enhance workflow efficiency.

3. E-commerce Auto Parts Store

Tech: *Next.js, TypeScript, Node.js, Express.js, PostgreSQL*

- Custom e-commerce platform for an automotive dealership with inventory browsing, filtering, and checkout.
- Reduced page load time by 10% through frontend optimisation and mobile-first responsive design.
- Boosted organic reach via dynamic sitemap generation and SEO automation strategies.

4. Mango Chairs – E-commerce Website

Tech: *React.js, Node.js, Express.js, Next.js, CI/CD Pipelines*

- Led end-to-end delivery coordinating frontend, backend, and QA teams for on-time production launch.
- Primarily responsible for backend (Node.js + Express.js) and deployment via CI/CD pipelines.
- Mentored junior developers on best practices; improved team code quality and delivery speed.
- Improved performance through code optimisation and lazy loading techniques.
